

HEALTHCARE IT PROGRAM/PROJECT MANAGEMENT

We are an accomplished organization of committed program and project managers in technology and clinical professions working to make quality healthcare information technology (IT) solutions accessible to organizations of virtually any size or shape, with any budget.

Anser's proven IT program/project management team can help drive healthcare administration efforts, Electronic Medical Record (EMR) implementations, integrations, and IT construction management. We provide expertise across the entire project lifecycle, from pre-implementation planning through post-live stabilization. We understand that every organization is different, and every project has its own unique set of complexities. Our consultants tailor their approach to work within your organization's framework and culture to help ensure you are expending effort effectively throughout the project lifecycle. Our services include:

- ▶ Managing our projects seamlessly with Project Management Body of Knowledge (PMBOK) methodologies
- ▶ Coordination of Office of Statewide Health Planning and Development (OSHPD) regulatory agency licensing and approvals
- ▶ Managing high volumes of client projects from start to finish
- ▶ Improving project success by monitoring work and taking corrective action when necessary
- ▶ Integration and interoperability of EMR and Telehealth systems
- ▶ Cultivating transparency and accountability to project status and possible barriers
- ▶ Improving customer and stakeholder satisfaction
- ▶ Revenue cycle analysis
- ▶ Managing scope and scope creep that can derail project deliverables
- ▶ De-escalating and mediating key decisions to keep projects moving forward
- ▶ Optimization and implementation of EPIC and Cerner EMR systems

IT Program/Project Management Team

MARK BEATTY, PROGRAM MANAGER

Mr. Beatty is an information technology specialist experienced in healthcare IT management, construction, network and physical infrastructure, telecommunications, and advanced IT equipment support. Mr. Beatty has over 19 years of experience as an IT professional including 15 years in project management for new and retrofit construction in hospitals and healthcare facilities.

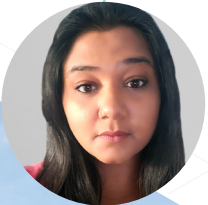

JENNIFER JORDAN, SENIOR PROJECT MANAGER

Ms. Jordan is a senior project manager with experience supporting several major healthcare organizations implement major IT installations, varying from ICD-10 conversion to working to stand up remote back-up servers. She is very experienced optimizing Epic in hospitals that had previously installed modules and implementing myChart for patient appointment management.

RICH TINNELLY, SENIOR PROJECT MANAGER

Mr. Tinnelly is an IT project manager experienced in healthcare and dental EMR implementations. Throughout his more than 9 years of Epic experience and 6 years of project management experience, Rich has developed a proven track record of leading intricate projects involving internal and external stakeholders to support operational and strategic goals.

AMANI LATIF, SENIOR PROJECT MANAGER

Ms. Latif is a productive, experienced, and problem-solving IT project management professional with exceptional application analysis, build and implementation, training communications, client relations and database administration skills in health IT operations. She has experience with successful EMR implementation in inpatient/outpatient hospitalization, ambulatory, and physician practices.
